

3-28-68

Dear Mr. Weisberg:

Enclosed is a paper on the Aftermath of the Assassination. I think there can be no doubt that the ambulance running at 12:34 was connected with the shooting involving the President for the dispatcher explicitly says so. I think the enclosed may be the explanation. -This cannot be the epileptic since the epileptic would have arrived at Parkland about 12:30 - none is on the Registration (Price Exhibit.) The epileptic, I'm sure, was a fraud: police do not run epileptics to hospitals, as a matter of fact. I think the epileptic must have been a dodge to draw spectators away from the sign-assassination site up to the corner. It is timed right for that. No such ambulance arrived at Parkland after 12:30. This was 606 ambulance on the epileptic, the same ambulance called for the hearse, an Oneal ambulance. Oneal also took Oswald. Oneal seems to have had a special in with the cops.

I plan to send you a series of papers like the enclosed, condensed for quicker reading and with enough citations to enable you to check them. Then if you want any one of them, or all, expanded, we will be glad to do that, and give full citations. The papers will carry through from the assassination to the arrest of Oswald. In effect, it will be a complete exposure of the conspiracy in the DPD: you can't put the evidence on this in order without seeing the complete outline of the operation and who did what.

You will, I trust, forgive me for sending you so much and at my own will. This case has come apart. I eat and sleep it. And I think the time is crucial. I have acquired a number of gray hairs, my first, these last two months but I am not ashamed of them.

Also enclosed is a paragraph or two on the Wise article in the Post. I seem to have been wrong when I said we were going to get our mock conspiracy but it would now be right wing. Some may be trying to make it right wing for greater plausibility. Johnson's line is definitely going to be leftwing from the Wise article.
